

ABSTRACT OF THE DISCLOSURE

A print order receipt unit includes a reading device for reading image data of an image recorded on a recording medium, a display, a print order input device for inputting for a print order of the recorded image, a first processing system for displaying the image from the image data read by the reading device on the display and receiving an order instruction from the input device using the displayed image to generate order information, a first memory into which the image data of the image read by the reading device is stored, and a second processing system for storing the read image data into the first memory in parallel with processing by the first processing system. The order information generated by the first processing system and the image data stored into the first memory by the second processing system are related to each other and output.
